THE MOHAWK WALK

Number 1.

RULES:

The group may attempt the cable transverse en - masse and count individually, the number of times that each person touches the ground, i.e. slips off the cable.

At the end of the transverse, each participant states his / her number of falls, a total is taken and another attempt is initiated to try and better that score.

SPIDER WEB

Number 3

OBJECTIVE:

To move an entire group through a fabricated web arrangement so that no one touches the web material. After a web opening has been used for a passage, it cannot be used again.

RULES:

Once a web opening is used, it cannot be used again.
If a participant touches a section of web during passage, that person must return and start again.

If a helping person touches the web for any reason, that individual also must return and start again.

BALANCE POLES

Number 4.

OBJECTIVE:

See how many people you can get on each of the three balance poles.

A project of the ROTARY CLUB of WARRNAMBOOL Inc.

TEE SWING

Number 5.

OBJECTIVE:

To move the entire group through the T Swing.

RULES:

- Participants line up on the lengthwise starting pole.
- The swing rope is given to the first participant who swings across from the lengthwise to the horizontal log and then must swing the rope back to the next participant.
- The ground between the vertical and horizontal logs is banned and anyone who inadvertently touches the ground must begin again.
- Each person must try to land on the lengthwise log and stay there until the entire group is on top of horizontal log together and remain balanced there for a minimum of five seconds. Stepping or slipping off the platform results in a trip back to the start for the offender.

T.P. SHUFFLE

Number 7.

OBJECTIVE:

For a group, standing balanced on a horizontal pole, to change ends on the pole without touching the ground.

RULE:

- Starting position for each group is to have two evenly numbered groups facing each other while balanced on the log.

N.B. The second and third attempts usually result in a considerable improvement because of the increased co-operation and experience.
